### **DETAILED ACTION**

Receipt is acknowledged of Applicant's Amendment and Terminal Disclaimer in re US 6,197,779 filed on 04/07/06. New claims 30-52 were added. Claims 1, 2, 5-10, 12, 13, 28, and 30-51 are pending in the instant claims. Claim 52 is withdrawn from consideration.

### ***Election/Restrictions***

Newly submitted claim 52 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

New claim 52 recites a process of preparing; however, the previous examination concerns a composition.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 52 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### ***Additional Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir.

Art Unit: 1618

1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 2, 5-10, 12, 13, 28, and 30-51 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over U.S. Patent No. 6,440,986 and 6,903,213. Although the conflicting claims are not identical, they are not patentably distinct from each other for reasons of record filed on 12/16/2005 in the previous office action.

Additionally, the references do not specifically teach adding the ingredients and the viscosity in the amounts claimed by Applicant. The amount of a specific ingredient and viscosity in a composition are clearly a result effective parameter that a person of ordinary skill in the art would routinely optimize. Optimization of parameters is a routine practice that would be obvious for a person of ordinary skill in the art to employ and reasonably would expect success. It would have been customary for an artisan of ordinary skill to determine the optimal amount of each ingredient to add in order to best achieve the desired results. Thus, absent some demonstration of unexpected results from the claimed parameters, this optimization of ingredient amount would have been obvious at the time of Applicant's invention.

Claims 1, 2, 5-10, 12, 13, 28, and 30-51 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over copending Application No. 11/111358 and 11/111400. Although the conflicting claims are not identical, they are not patentably distinct from each other for reasons of record filed on 12/16/2005.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
